# LOOKING FOR PARTNERS FOR PARTICIPATION IN THE PROJECT OF RECOVERY OF UKRAINIAN ENERGY

## Energy development team

We are a professional energy developer that creates and manages heat and electricity generation facilities. We are one of the main experts in the energy supply sector.

BUENKO ENERGY

Russia disabled 6 gigawatts of Ukraine's energy capacity with missile strikes over the past few weeks. **80% of thermal generation (TPP and CHP Plant) was destroyed.** It will be very difficult, if not impossible, to restore the destroyed facilities before winter.

/01

**Therefore, action must be taken immediately!** Partner countries guarantee **full financial support.**

“  
Our goal is to find a reliable partner to participate in the largest project of our millennium, namely, in the restoration of the war-torn energy sector of Ukraine.

BUTENKO ENERGY

In 2022 - 2023, there was a concept of quick victory and the beginning of global reconstruction. **Now the situation has changed - it is necessary to restore here and now, constantly.**

Our goal is to find a reliable partner to participate in the largest project of our millennium, namely, in the restoration of the war-torn energy sector of Ukraine.

BUTENKO

/02

We are talking about the immediate creation of a powerful **mobile energy sector**, as an anti-crisis measure, and the construction of **new generating capacities** throughout Ukraine according to the **“BUILD BACK BETTER”** principle with maximum decentralization.

/03

Our goal is to find a reliable partner to participate in the largest project of our millennium, namely, in the restoration of the war-torn energy sector of Ukraine.

BUTENKO

Ukraine's needs for reconstruction and recovery are estimated by the World Bank to be unprecedented for the world **485 billion dollars.**

**The engineering and construction divisions of our team,** which since the beginning of the war have been actively participating in the liquidation of the consequences of missile strikes on energy facilities and the construction of protective structures for the Ukrainian energy infrastructure, **have now significantly intensified their activities.** They have very busy work schedules.

“  
Our goal is to find a reliable partner to participate in the largest project of our millennium, namely, in the restoration of the war-torn energy sector of Ukraine.

Our **energy development** team is simultaneously intensifying the **the search for partners worldwide** who are ready to combine our capabilities and efforts today **to become active participants in the largest project of our century in the very near future, namely the reconstruction of the war-torn energy sector of Ukraine.**

/06

Our goal is to find a reliable partner to participate in the largest project of our millennium, namely, in the restoration of the war-torn energy sector of Ukraine.

**OUR GOAL** is to find a reliable partner to participate in the largest project of our millennium, namely, in the restoration of the war-torn energy sector of Ukraine.

/07

In turn, our team **expresses a great desire** to share its successful experience and, in parallel with participation in the reconstruction of the energy sector of Ukraine, **to join the implementation of energy projects around the world.**

BUTENKO

# About us

We are experts in creating modern cogeneration facilities that not only provide electricity, but also produce heat.

Our main specialization is the construction of advanced combined heat and power plants (CHP), providing quality and efficient solutions in the energy supply sector. The experience we have gained is the result of implementing modern projects in the field of energy, specifically combined heat and power plants (CHP), and we take pride in our achievements.

We provide a powerful vision for the future of energy, helping our clients become energy leaders.

We are confident that our collaboration in the energy sector will bring significant benefits and contribute to mutual success.

Together, we can keep pace with energy innovations, increase profitability, and improve our commitment to the environment.

**Our goal is to find a reliable partner to participate in the largest project of our millennium, namely, in the restoration of the war-torn energy sector of Ukraine.**

# Our business processes:

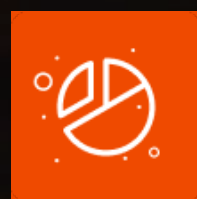

Assessment of the attractiveness of TCI cities, which are aimed at the expansion of energy development, and determination of the territories of future facilities

Study of the raw material base in regions and analysis of logistical supply capabilities

Production strategy development: technologies and equipment

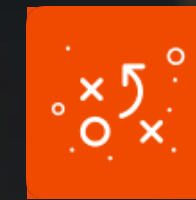

Development of a Banking Feasibility Study (BFS) for the project

Designing to the 'Ready-to-Build' (RTB) stage

Construction and commissioning of the generation facility

Asset management strategy selection

**Our goal is to find a reliable partner to participate in the largest project of our millennium, namely, in the restoration of the war-torn energy sector of Ukraine.**

BUTENKO ENERGY

I invite you to familiarize yourself with some of our successfully completed projects, specifically the most powerful biomass-fired thermal power stations in Eastern Europe:

Ivankivska Thermal Power Station (Kyiv Region)  
with a capacity of 18 MW of electricity.  
Investments amounted to 41 million US dollars.

Ohtyraska Thermal Power Station (Sumy Region)  
with a heat capacity of 40 MW.  
Investments amounted to 25 million US dollars.

Our goal is to find a reliable partner to participate in the largest project of our millennium, namely, in the restoration of the war-torn energy sector of Ukraine.
